Hitting Paydirt in Nevada

Gold and Silver Mining of Nevada, Inc. Acts on Notice of Intent

(Las Vegas, Nevada, August 5th, 2015)

Gold and Silver Mining of Nevada, Inc. ("CJTFD") (PINK SHEETS:CJTFD) a junior mining company in Nevada, announces significant mining activities surrounding their Notice of Intent Permit are moving forward.

The Company's mining claims known as Goldfield Basin will be seriously analyzed and evaluated and samples processed under a Notice of Intent in the coming months.

The first stage of the NOI will be a 30 ton truck load of sample material hauled to a mill which the Company have an understanding with for sample processing. CJTFD expect a value of approximately $300 per ton to be recovered from the sampled material and doré bars suitable for sale to be produced.

The total Notice of Intent Permit will continue after the first 30 ton truckload and will include the collection of up to 1,000 tons of ore sampling, analysis and processing.

The funding is in place to launch the project and the project itself will generate another $300,000 with about $150,000 netting back to the company and co-owner of the mining claims.

As these results become finalized, the company will conduct another Notice of Intent verification along with a qualified NA 43-101 report to establish a resource estimate appraisal and plan to move into production. We expect this effort will establish an estimate for a mining operation comprising over 10 million tons of ore at 30 feet of depth for each 80 acre Notice of Intent segment.

The company has a total of 620 acres currently and are in the process of adding another 220 acres for a total of 840 acres in this Goldfield Basin district.
About Gold & Silver Mining of Nevada, Inc.:
The company is in the business of precious metals mining and processing of massive gold and silver ore bodies in central Nevada. The gold and silver located in the company owned mining claims in these districts has been previously drilled and evaluated by qualified geologists and mining engineers. Extensive records, analysis, maps and pictures have been acquired with the staking, purchase, and filings of the various mining claims.

The company is not looking for ore, but is in the process of developing previously identified ore bodies which were not mined out and which have a previously studied history.

Safe Harbor Statement

This release includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E and/or 27E of the Securities Exchange Act of 1934 that are based upon assumptions that in the future may prove not to have been accurate and are subject to significant risks and uncertainties, including statements as to the future performance of the company and the risks and uncertainties detailed from time to time in reports filed by the company with the Securities and Exchange Commission. Statements contained in this release that are not historical facts may be deemed to be forward-looking statements. Investors are cautioned that forward-looking statements are inherently uncertain. Although the company believes that the expectations reflected in its forward-looking statements are reasonable, it can give no assurance that such expectations or any of its forward-looking statements will prove to be correct. Factors that could cause results to differ include, but are not limited to, the company's ability to raise necessary financing, retention of key personnel, timely delivery of inventory from the company's suppliers, timely product development, product acceptance, and the impact of competitive services and products, in addition to general economic risks and uncertainties.
